LOETZ VASE CYTISUS CA. 1902

Vase, Johann Loetz Witwe, decor, Cytisus creta on yellow, ca. 1902

The Cytisus decor, often referred to as "golden rain," is one of the most exquisite designs produced by the Loetz glassworks. Ist shimmering gold particles beautifully capture the essence of Secessionist ornamentation, emblematic of turn-of-the-century Vienna. This design reflects the keen artistic and aesthetic sensibilities of Max Ritter von Spaun and his team, showcasing their ability to resonate with the spirit of the times.
