

**BIRD SHAPED BOWL
WERKSTATTE HAGENAUER
CA. 1930**

€4.200,00

Small bird shaped footed bowl, Werkstatte Hagenauer Vienna, ca. 1930, polished brass, marked

Stylized bird sculptures form a distinct chapter among the animal figures produced by Werkstatte Hagenauer. Their first designs can be dated back to the 1930s, primarily originating from the creative mind of Karl Hagenauer.

An example of this is the small bird bowl, where playful natural forms blend harmoniously with abstract reduction. With only two highly simplified elements, the natural model is clearly depicted. A chased beak head and a hammered feather tail transform the simple goblet into a delightful little bird.

The outstanding craftsmanship, which is characteristic of the works from the Werkstätte Hagenauer, emphasizes the expressive power of the design.
