

**LOETZ VASE DECOR CYTISUS
CA. 1902**

€23.000,00

Important Vase with four handles drawn of the glass mass, Johann Loetz Witwe, decor Cytisus Maigrün mit Kaiserrot, ca. 1902

The decor Cytisus, with its golden shimmering particles, is undoubtedly one of the most beautiful Loetz decors, reflecting wonderfully the Viennese Secessionist style around 1900. Its silver oxide meltings and finely spun threads harmonize with the delicate shade "Maigrün mit Kaiserrot" (May green with imperial red). With four handles skillfully drawn directly out of the glass, this design can be considered one of the technically most demanding and artistically most striking creations manufactured by Loetz.
